

# Thanh Trung Truong

## Summary

Hi, I am Trung my birthday is 10/10/2000 I belong to the zodiac sign Libra, my favorite job is working with the user interface. I like to create anything related to art and everything is logical, I have worked with different CSS frameworks like Bootstrap, Tailwindcss,... Currently, I am working with the ReactJS library. I can flexibly learn everything about front-end development.

## Projects

### 2021–2021

Social Network • Full stack developer • In this project I use technology is called MERN Stack, I use cloud MongoDB to store data. I had implemented functionality stream capture by the camera, notification, when user clicks on the button, follow, like, or comment. Also, I had to implement functionality chat, call and call video. You can look for information [dev-to2k/social-network \(github.com\)](https://github.com/dev-to2k/social-network)

### 2021–2021

E-Commerce • Front end developer • I implement UI with Chakra-UI library, implement functions such as search, filter, add to cart, ... I use “fakestoreapi” to get data from API. You can look for information [dev-to2k/e-commerce \(github.com\)](https://github.com/dev-to2k/e-commerce)

### 2021–2021

Blog Application • Full stack developer • I use technology is called MERN Stack to build a blog application using MERN + TypeScript + Redux + Tailwindcss + ReactQuill + Socket.io + Twilio. Functions cover:

- Register, login, with email or phone number.
- Quick login with Google, Facebook, SMS.
- Forgot password, reset password and register new account by Email or SMS verification.
- Update personal information (name, password and avatar).

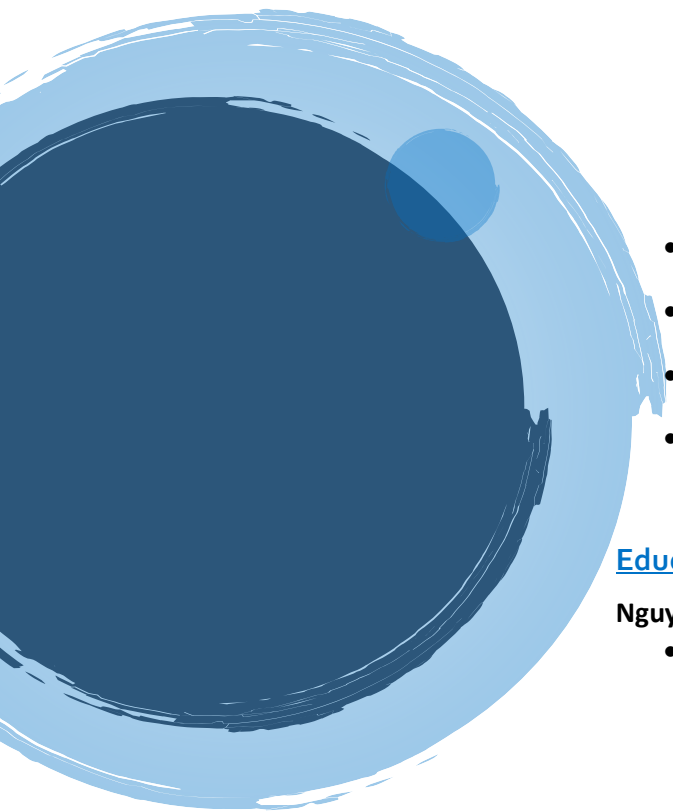

Viet Nam  
12 District, Ho Chi Minh  
City, 1A Highway

0948.868.324

Trungnek175@gmail.co  
m

- Create new blog with ReactQuill.
- Comment realtime with socket.io.
- Pagination, search with autocomplete MongoDB.
- You can look information [dev-to2k/blog-application \(github.com\)](https://dev-to2k.github.io/blog-application/)

### Education

#### **Nguyen Tat Thanh University**

- I'm currently a four-year student my GPA is 6.83/10. I have been studying Object-Oriented Programming with the Java programming language. Currently, I am pursuing Javascript programming language because I m interested in working with DOM elements.

### Activity

- Also, during my study in school, I have been participating competition "NTTU Startup 2020" that is a teamwork competition finally my team got 2nd place in the competition.

### Skills

My strength is HTML, CSS, JavaScript. Technology often used to work is ReactJS, Bootstrap, Tailwindcss.

I have a little knowledge of git, Github. I also often used git in my work.

I'm currently learning TypeScript and Python programming languages.

The secondary skills are back-end such as MongoDB, NodeJS, ExpressJS.

### My hobbies

Write rap music, photograph, draw, play guitar, traveling and learn new things.
